#### **Unify your Security Solution**

People Counting function works with deep learning algorithms.

This new function can analyze and detect human bodies and also tracking objects in real-time. This advanced feature provides statistics from the entrance and exit of subjects and has an accuracy of 95%.

#### Smart H.265+ & H.264+

STORM smart encoding technology can provide high-quality video with higher efficiency and can also reduce the cost of storage space and transmission adopting an advanced algorithm of auto stream control.

#### **On-board Analytics**

This camera responds accurately to specific events in a given area. Our algorithm enables Tripwire violations, intrusion detection, abandoned/missing objects and much more. Facilitate your viewing experience using on the edge analytics – one product, multiple features.
